

Thermal-Systems

**A new concept in monitoring
Temperature
Using wireless technology.**

Sensors are sealed to IP68 standards.
Every sensor is guaranteed to be within its specified accuracy.
Temperature accuracy meets UK Food Hygiene Regulations.
Meets EC directives for electronic & low-power radio equipment.
Calibration certificates, traceable to national standards,
are available for all sensors.

ICESPY

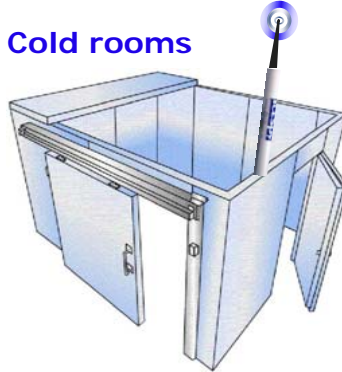

Icespy is A Revolution in Data Logging

Icespy provides versatile, multi-channel data logging using **radio**, **telephone lines** or **computer networks** to minimise cabling, facilitate fuss-free installation and provide worldwide data transmission.
Icespy data logging systems can be designed to service any building, or any site with multiple buildings or a multi-site operation.

Icespy transmitters and sensors are designed for use in a broad range of applications and can be located in **fridges**, **laboratories**, **warehouses**, **kitchens**, **freezers**:
In fact, wherever constant monitoring is needed.
They can be moved to any monitoring point as required, for virtually limitless system configurations.
This flexibility also enables systems to be easily adapted as your business grows.
